Work Philosophy: I love to teach. I will always care for you, offer you options, and directions to prevent injuries. Postures/poses will stimulate the body functions, activate a conscious humility, offer the opportunity to bow down to the mother, to open up and receive from the heavens. I share and paint a tapestry of your body in union with the mind and spirit. My inspiration comes from sparkly, loving, great guides, and I encourage you to dive in with me and take the Urban Yoga journey.
